Additional information:

- Last year, in Miles City, over 200 volunteers contributed approximately 355 hours to clean up our community, haul items to the landfill, and to recycle materials, during our May Cleanup Event. Volunteers, from 17 participating groups and City trucks, took over 12,000 pounds of debris to the landfill; trees were trimmed and 21 planters were filled for the downtown area.
- Spring is the best time to clean up, before the grass and weeds have a chance to hide trash and make retrieval difficult. Eliminating trashy areas reduces other unwelcome behavior. Fortunately, the reverse is also true – Clean Communities tend to stay cleaner. KMCB has already found the trash collected, in some areas, has decreased with regular maintenance. According to Keep America Beautiful research, a community, which ensures consistent and ongoing clean-up efforts, also sees a decrease in the amounts of contributed litter, thus driving down the costs of dealing with debris. The indirect costs of litter include the loss to businesses, based on the amount of trash deters customers from entering; keeping a new employer from locating in a community; and the reduction of real estate values. The presence of litter in a community actually decreases property values by 7%, according to the National Association of Home Builders pricing model.
- The thousands of community Great American Cleanup events orchestrated each year are often the first volunteerism exposure that children and families experience. It can be the spark to continue volunteer service into their future.

TRASH WALK

From May 1 to May 24 Keep Miles City Beautiful aims to remove trash from Miles City streets. Walkers are encouraged, on their daily walks, to take a bag and pick up garbage. When done contact KMCB to report which area was cleaned and the size and number of bags collected:

You may report in the following ways:

Email: jg@keepmcbeautiful.com

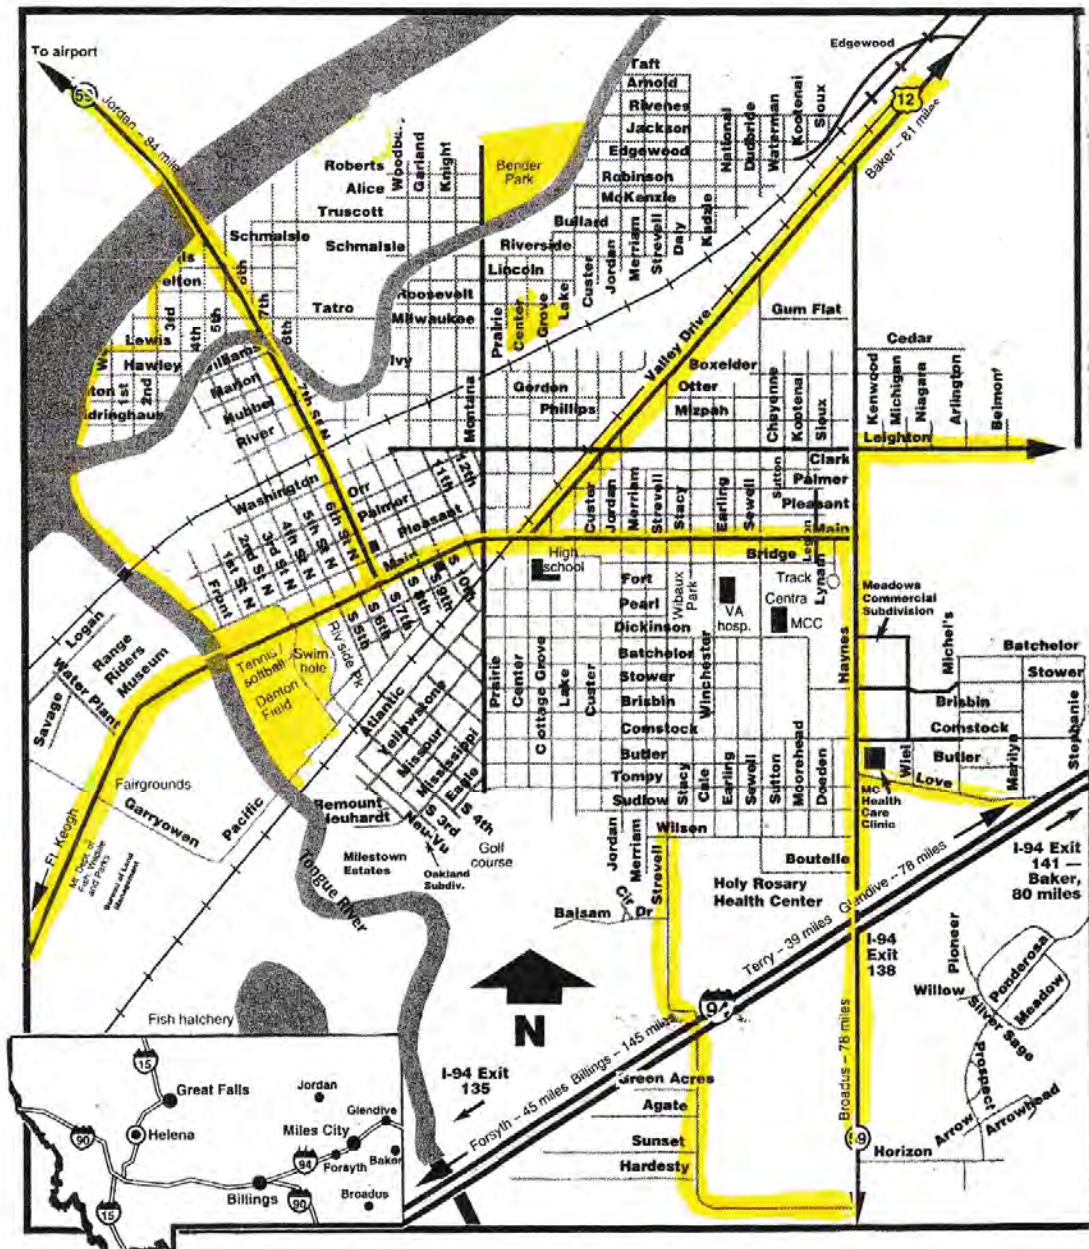

Text: 406-951-1129

Call: 406-951-1129 with a message

OR leave a private message on the Keep Miles City Beautiful Facebook page.

EXAMPLE- On May 2 Joe Dirt picked up 2 grocery bags of garbage on Lincoln St from Montana to Lake.

The areas in yellow are Adopt-a-Spot and Adopt-a-Highway sites and are maintained 3 times a year; these would be low priorities for the Trash Walk.

Dr. Temple Grandin is a designer of livestock handling facilities and a Professor of Animal Science at Colorado State University. Facilities she has designed are located in the United States, Canada, Europe, Mexico, Australia, New Zealand, and other countries. In North America, almost half of the cattle are handled in a center track restrainer system that she designed for meat plants. Curved chute and race systems she has designed for cattle are used worldwide and her writings on the flight zone and other principles of grazing animal behavior have helped many people to reduce stress on their animals during handling.

Curt Pate brings great value to the livestock industry. He spends his time conducting stockmanship demonstrations and trainings and also manages a small grazing operation in Montana. With his ability to think outside the box, his ability to challenge others to do the same, and a willingness to share his skills. Curt has set himself apart in conducting stockmanship clinics. His lifelong experience in ranching adds credibility and enables him to communicate his methods effectively to cattle ranchers throughout the country. In addition, Curt continues to seek out new learning opportunities to increase and hone his knowledge and skills and enjoys sharing this knowledge with others.

The group of 15 will be guided by Karen Stevenson. Leaving from the Evelyn Cameron Museum in Terry, MT, you will carpool using high-clearance vehicles, cross the Milwaukee Railroad Bridge that spans the Yellowstone River and drive the Calypso Trail, a primitive road, five miles through the Badlands. Along the way you will stop and take short hikes to ridges with long views of the Yellowstone Valley and eastern Montana. At the trailhead the group will walk the mile and a half in open country to the natural bridges where scenes from the PBS Documentary, "Evelyn Cameron: Pictures from a Worthy Life", were filmed.
