WINTER/SPRING KIDZ CLASSES

Hello Friends,

I hope you are excited to come out to the museum and start making more fun and exciting projects! The Paper Batik is a nice relaxing class, a good way to jump back into classes.

Plaster Carving will be a ton of fun!!! I can't wait to share my love of carving away plaster! We might even dive into watercolor as a surface coloring agent. It would be fun to explore those two mediums!

The Helpful Hive project will help students dive deep into their personal experiences and see how our community has come together to help one another. It's the perfect time to express how people in their lives have helped them through these crazy roller coaster days. And it's 3D, can't go wrong with 3D!

All the best,

Ms. BB

Bonny Beth L Olson

Paper Batik

Students learn about the ancient art of batik and use crayons and tempera paint to make a paper version of the technique. It's messy so don't wear your favorite clothes! Aprons are provided.

Ages: 8+ | Limit: 5 | Members: \$10, Non-Members: \$15

Plaster Carving Wall Hanging

Here is a chance to participate in one of the most delicate fulfilling carving experiences in a traditional medium. Students will learn a new skill - the art of carving! They will create their own bas relief sculpture and have a better understanding of value, contrast, negative and positive space! We will look at patterns and styles of the Oceania wood carvings, African masks and sculpture carvings, and Malaysian wood carvings for inspiration!

Ages: 9+ | Limit: 5 | Members: \$20, Non-Members: \$35

April 10

Saturday | 1:00 - 4:00 pm

Instructor: Bonny Beth L Olson

Within the hive, honey bees each play a very important role. They all work together to make sure the hive is doing great! The same goes for us humans.

In our own communities, there are many different kinds of workers, all important in the success of a happy life. In this class, students will use an array of different mediums. They will be asked to consider the people who provide services and necessities for them to create inside content of the three-dimensional hexagon cells that represent their respective contribution. Cells will be connected to create a honeycomb-shaped display. I'm very excited to see how students use their imaginations to create their own Helpful Hive piece!

Ages: 8+ | Limit: 5 | Members: \$10, Non-Members: \$15
