Summer Gardening

Gardening is a great cardiovascular activity. It can also improve flexibility and strength, while increasing your body's vitamin D production!

On the downside, this repetitive activity can result in soreness, due to the repeated and prolonged positions, often resulting in back, neck and knee pain.

FACT: Approximately 1600 Montanans die each year from a Tobacco-Related Disease.

Big Tobacco Companies need Smokers, Vapers, and Smokeless Tobacco users to replace those who are no longer using nicotine products.

30.2% of Montana High School students currently vape.

Nicotine is an addictive organic compound found in tobacco plants. It's the chemical that makes smoking cigarettes, chewing tobacco, and vaping so hard to quit.

Nicotine is associated with many health risks and problems. Tobacco is linked to cancer of the mouth, throat, and lungs. Smoking cigarettes causes emphysema and chronic obstructive pulmonary disease (COPD)

Quitting smoking or chewing tobacco can lead to nicotine withdrawal symptoms.

Nicotine replacement therapy like gum, lozenges, and patches are used to help people quit smoking, chewing, and vaping. The Quit Line is here to help you through the process of quitting.
